

E @ Rack

Engineered for Data Centers' ROI / Scientifically Enhanced for Businesses' TCO

Description

- ❖ Hallmark feature-rich 19" Server Rack for better airflow and heat dissipation
- ❖ Recognized as innovatively designed and developed
- ❖ Engineered for Green Datacenter and high-performance is required
- ❖ Design with aid from Computational Fluid Dynamics
- ❖ Space-Frame Technology for lightweight design and improved weight-to-strength ratio
- ❖ Specially designed extendable power strip
- ❖ Improved cable management
- ❖ Fits any vendor's servers and equipment
- ❖ At higher density performance, achieved 30% higher efficiency than conventional rack
- ❖ Support Static Loading up to 1500kg
- ❖ Support Power Loading >5kW
- ❖ Heat tested up to 16kW
- ❖ OPTIONAL: Multi-Factor Authentication Access Control

USD (2000)
